

PIOTR DOLIŃSKI

Senior SDET | Software Engineering & Quality Leadership

Warsaw, Poland dolinski.piotr.95@gmail.com +48 608 534 044 piotrdolinski.com [LinkedIn Profile](#)

Professional Summary

Senior Software Development Engineer in Test (SDET) with **10+ years of experience** in quality engineering, test automation and hands-on software development across fintech, payments and public-sector systems. As the first and sole QA at Mobilum Pay, I own quality strategy and automation across five engineering teams, a distributed API platform and mobile and web products. I design and maintain REST Assured API, Detox mobile and Cypress web test suites that run as required GitHub Actions checks on every pull request. Outside work, I build React Native, Expo and Next.js products, combining software engineering with quality leadership.

Core Expertise

PROGRAMMING & PRODUCT ENGINEERING

TypeScript

Java

React / Next.js

React Native / Expo

TEST AUTOMATION

Playwright

Detox

Cypress

Selenium WebDriver

REST Assured

Maestro

Cucumber

Jest

Appium

CI, DATA & TOOLING

GitHub Actions

Jenkins

Git

Docker

Postman

SQL

Kibana

QUALITY LEADERSHIP

Test Strategy

Quality Gates

Release Readiness

E2E / API / Mobile / Web

Professional Experience

Software Tester / SDET | Mobilum Pay

Feb 2025 - Present

- Joined as the company's first QA engineer and remain the sole owner of quality strategy, release criteria, test environments, defect management, reporting and go/no-go decisions across five engineering teams.
- Built and maintain REST Assured API automation, Detox coverage of critical React Native interactions and Cypress web suites across the company's distributed fintech platform.
- Designed a required GitHub Actions quality gate that builds the application and runs automated API, mobile and web checks on every pull request before merge.
- Developed AI-assisted workflows for test design, maintenance and regression analysis to extend the capacity of a one-person quality function.

Software Tester | Nexio Management Ltd.

Apr 2021 - Jan 2025

- Owned end-to-end, exploratory, regression and release testing for public-sector web applications, including complex test data preparation and technical demonstrations for client stakeholders.
- Developed Selenium WebDriver UI and REST Assured API smoke tests for each release; used Postman for exploratory API validation.

Software Test Analyst | Clear2Pay Poland

Aug 2018 - Apr 2021

- Built Java-based regression suites for customized implementations of a core payment platform using Cucumber, Selenium WebDriver and REST Assured and executed them through Jenkins.
- Standardized automation practices, mentored junior QA engineers and served as Scrum Master for one year.

Earlier QA Roles | Altkom, Lionbridge & Testronic

Oct 2015 - Aug 2018

- Black-box testing for insurance systems and functional/compatibility testing for AAA video games.

Selected Engineering Projects

Hands-on product engineering backed by the same quality mindset I bring to professional work.

piotrdolinski.com - Portfolio & Public Test Suite

Next.js · TypeScript · Playwright

- Designed and built a multilingual Next.js and TypeScript portfolio supporting five locales, localized routing and metadata, dark mode, responsive behavior and RTL Arabic.
- Created a public **Playwright E2E suite** covering critical journeys, axe-core/WCAG checks, responsiveness, localization and SEO; configured it for desktop and mobile browser profiles and GitHub Actions execution.

BUG: The Gathering - Mobile Roguelike Deckbuilder

React Native · Expo · TypeScript · Skia

in development

- Building an offline-first React Native and Expo roguelike deckbuilder with a deterministic TypeScript combat engine, seeded progression, five classes, hundreds of card definitions, Zustand persistence and Skia/Reanimated rendering.
- Developed a broad Jest regression suite covering combat rules, balance simulations, content and localization consistency, animation timing and previously observed failures, executed in pull-request CI.

Private Language-Learning Platform

in development

React Native · Expo · Maestro · NestJS

- Co-developing a private React Native and Expo language-learning product, owning QA strategy and Maestro E2E automation while contributing application bug fixes.
- Implemented a cross-repository push-notification system spanning the React Native application, React/Vite CMS and NestJS/Prisma API, including Firebase Cloud Messaging (FCM) token registration, message delivery and notification-triggered navigation.

Certifications, Education & Languages

Computer Science coursework - four semesters

2015 - 2017

Polish-Japanese Academy of Information Technology (PJATK/PJWSTK), Warsaw

- **Scrum Alliance Certified ScrumMaster (CSM)**
- **ISTQB Certified Tester Foundation Level (CTFL)**
- **Technical Training:** Java for Testers, Linux for Testers - Sages
- **English:** Professional working proficiency; used daily in an international environment
